

Downdraft Grinding Table

Suitable for grinding, polishing, deburring, welding, cutting and other working conditions of metal and non-metal workpieces.

Performance Description

- 1- Intelligent control system, simple operation.
- 2- Integral structure, beautiful appearance, small footprint.
- 3- Drawer type dust collection box, easy and fast to pour ash.
- 4- Dust-proof 5-hole socket, convenient to connect with electric tools.
- 5- Removable modular work surface.
- 6- Power status detection: broken phase, overvoltage and undervoltage alarm to prevent damage to the motor and electrical components

Standard Configuration

- 1- Imported flame retardant coated polyester fiber with filtering efficiency $\geq 99.9\%$.
- 2- Phase failure protection, overload protection.
- 3- Intelligent control system
- 4- Explosion-proof light
- 5- 5- Dustproof 5-hole socket
- 6- 12L dust drawer
- 7- 5m power cord

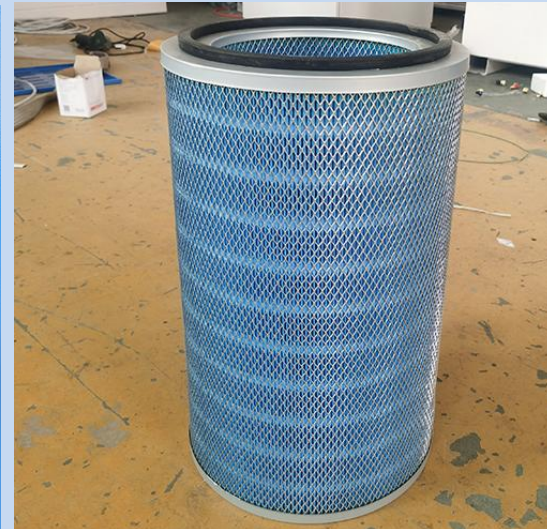

Optional Components

- 1- Non-slip soft pad
- 2- IO Port (remote control)
- 3- Stainless steel custom machine structure
- 4- Working surface can be designed as round hole, square hole, long hole.
- 5- Working surface can be stainless steel, brass, nylon, polyurethane.

Technical Parameters

Model	MLWF320-DM
Motor Power	3KW
Working Voltage	380V 50Hz
Air Volume	3200~3600m ³ /h
Filtering Accuracy	0.3um
Filter Material	Imported flame retardant coated polyester fiber
Filter Area	28m ²
Filter Size	Φ 325*600mm
Cleaning Mode	Automatic Pulse Back Blow
Noise Level	≤75dBA
Dimension	1500*800*1470mm
Weight	300 ± 30kg
